

3D Painting Project

Doerrrer

Assignment: To create a painting with a raised surface and 3D element.

Option 1: Layered Cardboard & Paper

Create a painting with a subject of your choice using cardboard and paper.

- 1) Use a sheet of Cardboard for your foundation.
- 2) Cut out shapes in cardboard and paper and build them up to create a raised surface.
- 3) Paint areas of the cardboard and leave some areas unpainted.
- 4) Paint the paper.
- 5) Glue on the layers.
- 6) Add additional paint and details.

Option 2: Layered Resin Painting

Create a painting using acrylic paint and 3 layers of resin.

Process:

- 1) Choose a foundation: a bowl, ceramic cup, wood panel with a frame.
- 2) Paint your first layer or add real objects like rocks (for an ocean or pond scene).
- 3) Mrs. Doerrrer will pour the resin. Let dry over night.
- 4) Paint your next layer.
- 5) Pour resin.
- 6) Paint your final layer. Add objects if desired.
- 7) Pour resin if desired.
- 8) Paint fine details.

Option 3: Modeling Paste and Acrylic Paint

- 1) Use canvas board as your foundation.
- 2) Sketch in main subject.
- 3) Use acrylic paint and modeling paste to build up 3D areas.
- 4) Continue with acrylic painting techniques.

Option 4: Glue Gun Painting

- 1) Use canvas board or Masonite board for your foundation.
- 2) Sketch in your main subject and background.
- 3) Use a hot glue gun to “paint” on your subject and details. Let dry.
- 4) Prime over your glue with gesso. Let dry.
- 5) Use acrylic painting techniques to paint your project.
