

## Holiday Card Project

Create 1 to 2 Holiday Cards in Photoshop.

You may create a card for the Winter Holidays, a Happy New Card, or a Holiday card personal to you and your family traditions.

Size: 5 " height X 7" width. 300 ppi

### Requirements:

- Use a specific color scheme
- Have a consistent theme carried through out and repeated. For example: gold and white colors, 1 font, snowflakes and winter wonderland
- Use a font that is legible and consistent with your theme
- You may make an illustration or a card with family photos.
- A family photo card must still have a background, theme, and color scheme uniting everything in a cohesive way.
- Show advanced Photoshop skills

### Possible subject matter:

- Winter landscape: trees, snow, hills
- Winter activities: skiing, sledding, ice skating
- Holiday items
- A San Diego beach winter scene
- Your family traditions and celebrations

You may use a tutorial to learn new skills, but make sure to substitute new photos, colors, add things, etc. Make it your own!
