

Digital Art/Photography Mixed Media: Digital art to Fine Art

Create a work or series of photographs that use digital and fine art media combined in unique ways.

Possible techniques and media to combine:

- Photographs (stock photos or photos shot by you).
- Hand drawings or paintings created by you, scanned and layered in.
- Brushes, textures, and/or patterns hand drawn or hand painted by you and scanned or photographed.
- Brushes, textures, and/or patterns created in Photoshop.
- Vector shapes and illustrations made in Illustrator.
- 3D shapes or text made in Illustrator.
- Line Art made in Photoshop or Illustrator.
- Digital paintings or drawings created in Photoshop.
- Text effects in Photoshop.
- Manipulated text using Illustrator. (Outlines, warp, envelope distort)

Digital Art/Photography Mixed Media Options:

- 1) Digital Mixed Media Artwork: Create an artwork that combines photographs and other digital techniques such as vector illustration, digital painting, typography, and/or other digital effects.
- 2) Photography Transfers and Mixed Media: Create a work that combines your original photographs with fine art media. Shoot your own photos and experiment with image/photo transfers onto a support (paper, canvas, plexi-glass, masonite board, wood). Combine with other media such as paint, ink, watercolor, graphite, newspaper...
- 3) Photography with Mixed Media Overlay: Shoot your own photo(s) and make a large print. Experiment with drawing and/or painting over the photo and adding other new media in layers to add unique details, textures, colors. Overlap and weave photos. Add new papers and texture. Avoid simply tracing over photos.
- 4) Polaroid Transfers: research polaroid transfer techniques and creative ways to alter and supplement the original photo.
- 5) Cut, sew, and embroider over your own digital artwork and photos.
- 6) Create layered collages with your own digital illustrations, photographs, and/or hand drawn illustrations.
