Photoshop Tutorials - Ongoing Project

You will complete 2 unique tutorials on your own, save them as .psd files (that shows your layers) and turn them in at the end of the semester.

- Review the Photoshop Tutorials links on the Resources page of the website and choose 2 tutorials that interest you.
- Each tutorial you complete must teach you something new and complex.
- The tutorial should take you at least 40 minutes to complete. It should take more - if not, it may not be complex. Choose a different tutorial.
- Choose tutorials about "effects, 3D, designing, painting, drawing, or photo effects"
- Do not choose type tutorials - we will do those later
- Substitute your own photos instead of the tutorial's photos. Find your own photos on freedigitalphotos.net or getty images.
- Learn the skills, but make the artwork your own! For example: *if the tutorial makes a frog out of raspberries, than you make a lizard out of eggs, or a squirrel out of grapes.*
- If you are unsure of the complexity of the tutorial, see me to review and approve it.
