Shadow Play Photography Project

Assignment: Get creative with shadows and light!
Shoot and/or create (with Photoshop) 5 photographs that employ shadows as the subject.
Create 1 photograph from each concept listed below below:
1) "Shadow with a mind of its own": a subject with a shadow, but the shadow is a different shape / doing a different pose than the subject.
2) "The shadow that's alive": the shadow is interacting with something real.
3) Long shadows from above – elongated shadows with low light source
4) Create abstract forms, create patterns
5) Cast shadows onto objects or people

Requirements:
2 must be a straight photograph. Shadows created by a light source.
The other 3 may be straight photography or altered in Photoshop.

Things to consider:
• Shadow as the subject
• Express emotion and mood
• Change perspective
• Create abstract forms
• Colored shadows
