

Symbolic Partner Portrait

Create a symbolic portrait of another student in class. You will create an artwork or series of photos that represent some aspect or aspects of a student in this class whom you have just met. This portrait should not be a physical representation of the student. Instead, reveal unique and interesting things about the student through images, objects, activities, etc. Do not include any images that reveal the student's face. The class should be able to learn new things about this student after viewing your artwork and guess who the portrait represents!

Begin by introducing yourself to another student. Speak with someone you have never met!

Take turns asking each other these questions:

- 1) What did you do this summer?
- 2) What are your hobbies or favorite activities? Explain.
- 3) Whom do you admire and why?
- 4) Who/what inspires you and why?
- 5) What is a song on your playlist that describes you right now? Explain.
- 6) If you were a superhero or villain, what would your power be? Explain.

Now ask your partner 6 more questions you make up and write down their responses.

Based on your conversation create a symbolic portrait of that student revealing something about their personality.

Digital Art:

Size: 8x10" or 10x8" – 150 ppi

Digital Photography:

Create a series of 4 to 6 photos.

What you will turn in: 4 to 6 photos as separate .jpegs and 1 document with all 4 - 6 photos on it arranged in a series.
